DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Maschmann.

Maschmann's computation method includes determining a common factor from a sum-of-products expression (note equation 2 in column 4) and utilizing a MAAC kernel (note Fig. 4) to carry out the computation.

3. Claims 7-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Hung et al (Hung).

Hung's Fig. 13a clearly shows an MAAC kernel (e.g. multiplier 314, adder 318 and the register that receives the output of the adder 318), an AMAAC kernel (add the adder 310 to the MAAC kernel) and a plurality of MAAC kernels (Figs. 13a and 13b).

Claim Rejections - 35 USC § 112

4. Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2124

The last line of claim 2 is inconsistent with the two preceding lines because differs quantities are input to the second input. In claim 4 "(c)" lacks clear antecedent basis.

Conclusion
